Research Methods: User Research • Usability Testing • Competitive Analysis • Heuristic Evaluation • Research Synthesis • Review Analysis

Tools: Figma • FigJam • Lyssna • Sunbeam CX

AI Tools: Stitch • Lovable • Cursor • Claude • ChatGPT • Figma Make • NotebookLM

DESIGN PROJECTS

MyFitnessPal — Nutrition Tracker Redesign | Self-directed case study 2026 · Concept · Mobile · B2C

- Identified repetitive food logging as a key usability issue by synthesizing insights from ~2,000 App Store and Trustpilot reviews, literature review, and community discussions.
- Redesigned the food logging workflow using history-based predictions while preserving the existing navigation and free-tier experience, reducing interaction effort without introducing additional screens.
- Validated the redesigned experience with 9 usability participants, achieving 100% task completion with every participant choosing predicted food cards over search.

EXPERIENCE

Management Trainee | Mahindra Finance 05/2025 – Present

- Managed end-to-end execution of a ₹10 Cr business initiative, collaborating across customers, external partners, and a 7-member team to deliver operational outcomes at scale.
- Identified operational friction points and collaborated with cross-functional stakeholders to improve execution workflows, enabling faster and more reliable service delivery.

Founder | Crochet Curio (D2C brand) 02/2021 – 07/2022

- Built and grew a D2C brand by iterating on product presentation and customer experience using direct customer feedback, increasing sales by 20% in six months.
- Maintained ~90% customer satisfaction by iterating on products based on customer feedback and purchasing behavior.

EDUCATION

MBA – Marketing | TAPMI School of Business, Jaipur (8.64 CGPA) 2025

BA (Hons) Political Science | Maitreyi College, University of Delhi (7.378 CGPA) 2022
